PROFESSIONAL SUMMARY

Full Stack Developer with 1 year of experience designing and delivering end-to-end web and mobile applications using React.js, React Native, Node.js, and Express.js, alongside PHP and CodeIgniter 4. Skilled in building marketplace platforms, CRM systems, and inventory management solutions powered by MySQL and MongoDB, with real-time functionality through Socket.IO and Firebase Cloud Messaging. Experienced in REST API development, Google Maps API integration, and third-party service integration.

CORE COMPETENCIES

Full Stack Development • React.js • React Native • Node.js • Express.js • RESTful API Design • MySQL • MongoDB • CRM Development • Marketplace Platforms • Real-Time Applications • Firebase • Socket.IO • Google Maps API • Auth & Authorization • Third-Party API Integration • Agile Development

TECHNICAL SKILLS

- **Frontend:** React.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, PHP, CodeIgniter 4
- **Database:** MySQL, MongoDB
- **Real-Time & APIs:** REST APIs, Socket.IO, Firebase Cloud Messaging (FCM), Google Maps API, Google Places API, Cloudinary, WhatsApp API
- **Tools:** Git, GitHub, Postman, Android Studio, VS Code, Figma

PROFESSIONAL EXPERIENCE

Software Developer — ELE Market Place Technologies

1 Year

- Delivered full-stack features across three production applications spanning React Native mobile apps, a React.js CRM/admin panel, and Node.js/Express.js backend services supporting marketplace, warehouse, and internal operations workflows.
- Designed and developed RESTful APIs and relational/NoSQL database schemas in MySQL and MongoDB, powering authentication, authorization, and core business logic for CRM, inventory, and marketplace modules.
- Implemented real-time communication using Socket.IO to enable live chat between customers and vendors, and integrated Firebase Cloud Messaging to deliver push notifications across mobile applications.
- Integrated Google Maps and Google Places APIs for location-based services and Cloudinary for scalable media/image management across customer- and vendor-facing apps.
- Built barcode- and QR-based inventory and warehouse modules using CodeIgniter 4 and PHP; optimized API performance and backend architecture for scalable, multi-user platforms while collaborating via Git within Agile cycles.

KEY PROJECTS

Pineverse — Marketplace Platform for Movers & Packers [Live Project Link](#)

React Native, React.js, Node.js, Express.js, MySQL, Socket.IO, Firebase Cloud Messaging, Google Maps API, Cloudinary

- Built a two-sided marketplace enabling customers to request quotes, negotiate pricing, and track bookings, while vendors manage leads, subscriptions, and quotations in real time.
- Developed a React.js CRM for administrators to manage customers, vendors, bookings, payments, and revenue analytics; connected mobile and web apps through a shared REST API backend with live chat and push notifications.

PreMove — Internal Enterprise Mobile Application [Live Project Link](#)

React Native, Node.js, Express.js, MySQL, Firebase, Google Maps API

- Built a relocation-management app allowing customers to track move status, request home inspections, and upload video surveys in place of physical visits; built manager tools for inspection scheduling and daily operations.
- Developed REST APIs and MySQL schema for lead, inventory, and quotation management, integrating Google Maps APIs and push notifications while optimizing backend performance.

Pine Store — Warehouse Management System

CodeIgniter 4, PHP, MySQL, JavaScript, AJAX

- Developed a barcode-based inventory and warehouse tracking system with parent/child barcode management, delivery tracking, approval workflows, and AJAX-driven reporting dashboards for customers and managers.

EDUCATION & CERTIFICATION

Bachelor of Computer Applications (BCA) | TCS iON National Qualifier Test (NQT) — Certified
